INFORMATION AND DIRECTIONS

The properties typically emollients and firming of plant extracts, associated to the moisturizing action of oils contained in the rich formulation, allow Cremagel after-shave cream a dual action: pre and after shave. Applied in small quantities before the foam-beard, it determines an effective softness of the skin, making the shave easier and preventing irritations. Tapping on the face just shaved and well rinsed with fresh water, exerts an astringent, soothing and anti-reddening action which mitigates the typical skin irritations of the face and neck.

NOTE: The products can be modified in order to improve its functionality. In particular the use of active ingredients and extracts, actually obtained using standard methodologies, can change color and smell of the products for the impossibility to obtain crops of vegetable equal to each other.
