### INFORMATION AND DIRECTIONS

The Rathany is a plant known for its purifying properties, when used in emulsions for the treatment of oily or asphyxiated skins, with black points, or acne. It improves the characteristic imperfections of impure skin by helping to control excess of sebum. Its habitual use and its absorption not interfere with organic functions, acting as a protective from external agents for epidermis, and acting as system-barrier with broad spectrum. Clean properly your face and rinse with warm water. Then apply the TONER. Spread a light veil of RATHANY CREAM and gently massage, focusing on the most affected parts. It's important to match the use of this cream to LATTE and TONER, as the synergistic action of the three products, coupled with constancy in the daily cleaning and application, provide significant results in a few weeks. It also recommends the weekly use of CLAY MASK FOR OILY AND IMPURE SKIN with absorbent action, preventive against the proliferation of pollutants. During treatment, avoid at least for the first month, the use of any type of makeup.

NOTE: The products can be modified in order to improve its functionality. In particular, the use of active ingredients and extracts, actually obtained using standard methodologies, can change colour and smell of the products for the impossibility to obtain crops of vegetable equal to each other.
