ORGANOLEPTIC CHARACTERISTICS

Appearance: thick cream
PH : 5.2 ÷ 5.8

Fragrance : talc
Colour : beige

MANUFACTURE

Treated in a turboemulsifier under vacuum-seal with suitable temperature for preserving raw material and active ingredients.

PACKING

Packed in a controlled environment and temperature (22°), with sterilized machinery according to the law n.713 dated 10/11/86.

PACKAGE

Tiziano vase satin white glass ml 50 + round red lid

EXPIRATION

PAO (Period After Opening) 6M

INFORMATION AND DIRECTIONS

The most viable adjuvant alternative to cosmetic treatments in aesthetic medicine for the wrinkles of the neck and décolleté.

The main active with remodeling and lifting effect, play firming, rejuvenating action, but primarily promotes strengthening of the tone already in a few weeks of use.

There are areas where the skin is more delicate and subtle. These features, with time, make them more vulnerable to aging over the years.

For these reasons, after 30 years we should start applying KOLLUM as prevention to early wrinkles. In the case of skin that is already mature, KOLLUM the most viable adjuvant alternative to cosmetic treatments in aesthetic medicine for the wrinkles of the neck and décolleté.

KOLLUM is specially formulated for rapid absorption in depth, so to avoid the extension of the period of application, after those already dedicated to the face.

The main active lifting and reshaping effect of KOLLUM are PALMITOYL TRIPEPTIDE-5 and MARRUBIUM VULGARE EXTRACT, two substances that perform different actions (toning, firming, rejuvenating), but primarily to encourage and help strengthen, tone and elasticity of skin, moisturizing it and then making it softer and toned in six / eight weeks. These 2 p.a. was associated with a plant complex called extensin, or naturalisimile substance composed of extracts of horsetail, ginseng, gotu kola and horse chestnut standardized to 20% of escin.

Active ingredients:

Horehound extract: The wild horehound is a perennial herb of the family Lamiaceae, native to the Mediterranean region and Central Asia, and that can be found in Europe and the western United States. It blooms from May to August. The common name of the plant which produces the extract is derived from the Hebrew Mar = bitter and Rob = juice. Horehound is traditionally used in the symptomatic treatment of cough and bronchial acute manifests mucolytic and expectorant activity. Besides, it has general tonic, stimulant, anti-inflammatory and vessel regulators properties.

NOTE: The products can be modified in order to improve its functionality. In particular the use of active ingredients and extracts, actually obtained using standard methodologies, can change color and smell of the products for the impossibility to obtain crops of vegetable equal to each other.
