## INFORMATION AND DIRECTIONS

Manisan hands cream, specific wellness treatment for hands, comes up with a balanced formula rich in plant substances carefully selected. It protects red, dehydrated and cracked hands, restoring softness and elasticity to the skin made arid and dry from external influences, from domestic and work operations to which they are daily subject. It is a useful adjunct in the process of progressive dryness caused by detergents, too aggressive soaps, abrasive pastes, etc. Due to its particularly pasty composition, is advisable to use it in the evening before going to bed, or when you can stay for at least 20-25 minutes without using your hands. Spread a generous amount of Manisan hands cream every day and repeat another light application after about 30 minutes. Do not insist with the massage to speed up the absorption.
