

# NATURELIFECOSMETICSGROUP

FROM NATURE TO THE HERBALIST LABORATORY  
DALLA NATURA AL LABORATORIO ERBORISTICO

## TECHNICAL DATA SHEET

PRODUCT NAME:

**LIPOCELLINA IMPACT SHOCK VIALS**

**ACTION**

**Lipo-draining, slimming**

### INGREDIENTS

**Aqua, glycerin** (humectant, solvent), **Maltodextrin** (emulsion stabilizing, cond. Skin), **Parfum**, **Xanthan gum** (Xanthan gum: binder, stabilizing emulsion), **Caffeine** (cond. Skin), **Carnitine** (detergent), **Microcrystalline cellulose** (stabilizing emulsion), **Paullinia cupana seed extract** (cond. skin, toning), **Caprylyl / capryl glucoside** (detergent), **Cysteic acid**.

### ORGANOLEPTIC CHARACTERISTICS

Appearance: liquid

Fragrance :

PH :

Colour :

### MANUFACTURE

Treated in a turboemulsifier under vacuum-seal with suitable temperature for preserving raw material and active ingredients.

### PACKING

Packed in a controlled environment and temperature (22°), with sterilized machinery according to the law n.713 dated 10/11/86.

### PACKAGE

Box composed of 12 amber vial flacons ml 7

### EXPIRATION

PAO (Period After Opening) 6M

### INFORMATION AND DIRECTIONS

These substances trigger lipolysis in adipocytes and promote the transport of fatty acids into the cell mitochondria. The combined action of this complex leads to an obvious decrease in the thickness of skin oils and this is the ideal system to make more smooth and compact the skin surface. It triggers the process of lipolysis in human adipocytes, accelerates the hydrolysis of triglycerides, accelerates the oxidation of fatty acids into the mitochondria, thereby drastically reduces the thickness of fat and significantly improves the appearance of orange peel skin.

Practically, through the special system for the removal of lipids by using this particular complex, the fats themselves are decomposed into water, carbon dioxide and energy into the mitochondrion. Thanks to these active substances, widely tested in their effectiveness, Lipocellina impact has slimming, modelling and smoothing activities, that speed up the natural mechanism of reduction of subcutaneous fat and makes the skin smoother and firmer. Therefore ideal for significantly counteract the appearance of orange peel skin and reduces the thickness of the adipose tissue, especially in the presence of significant water retention.

NOTE: The products can be modified in order to improve its functionality. In particular the use of active ingredients and extracts, actually obtained using standard methodologies, can change color and smell of the products for the impossibility to obtain crops of vegetable equal to each other. This information, obtained from extensive literature of authors Baroncini, Duni-Cislaghi, Delitala-Drago, Rebora-Guarrera, Proserpio-Marelli-Patti, Zanetti, Morelli, Chiereghin, Bonadeo, Brigo, Klaus Gaebelain and others, are strictly and exclusively reserved operators.
